Caesarean Section Operation Note

Date: 01 Jan 2026

Patient	FICTIONAL PATIENT	**Identifier**	DEMO-001

Procedure and team

Procedure performed: Lower-segment caesarean section (fictional).

Procedure date and time: 01 January 2026, 09:00 (fictional)

Urgency: Elective

Indication and preoperative diagnosis: Persistent breech presentation at term.

Postoperative diagnosis: Persistent breech presentation at term.

Surgeon and assistants: Dr Demo A; Dr Demo B (fictional)

Anaesthesia and anaesthetist: Technique recorded in the separate anaesthetic chart; Dr Demo C (fictional).

Consent and safety checks: Consent, identity, procedure and site checks documented in the fictional theatre checklist.

Maternal and delivery context

Gestational age and indication detail: 39 weeks; persistent breech presentation in this fictional case.

Antibiotic / thromboprophylaxis record: Individual assessment, drug, dose and timing recorded in the perioperative chart.

Abdominal and uterine incisions: Transverse abdominal incision; lower-segment transverse uterine incision.

Operative findings / adhesions: No significant adhesions described; uterus and adnexa inspected.

Delivery method and difficulties: Breech extraction; no extraction difficulty documented.

Birth date and time: 01 January 2026, 09:18 (fictional).

Newborn record

Newborn identifier and sex: Baby A (fictional); sex documented in neonatal record.

Birth weight: 3200 g

Apgar at 1 minute: 8

Apgar at 5 minutes: 9

Cord gases: samples and results if obtained: Not obtained in this fictional example.

Resuscitation / neonatal team handover: Routine neonatal assessment; handed to neonatal team.

Operative completion

Placenta, membranes and specimens: Placenta and membranes inspected and appeared complete; specimen disposition recorded.

Uterine repair, tone and haemostasis: Uterine incision repaired; tone and haemostasis assessed.

Uterotonics / other intraoperative medicines: Exact drugs, doses and administration times recorded in the anaesthetic chart.

Abdominal closure / drains / dressing: Layers closed; no drain; sterile dressing.

Estimated blood loss: 450 mL

Instrument, swab and needle counts: Confirmed complete.

Complications / response: None observed in this fictional procedure.

Maternal condition, destination and postoperative plan: Stable transfer to recovery; individual monitoring and postoperative orders handed over.

Clinician: DEMONSTRATION ONLY - NOT SIGNED **Signature:** _____
