Lower GI Endoscopy

Date: 01 Jan 2026

Patient	FICTIONAL PATIENT	**Identifier**	DEMO-001

Indication: Evaluation of intermittent rectal bleeding (fictional demonstration).

Premedication / Sedation: No intravenous sedation in this fictional example.

Bowel preparation: Adequate for mucosal assessment; Boston score 3 + 3 + 3 = 9.

Extent of examination: Caecum reached; appendiceal orifice and ileocaecal valve identified. Terminal ileum examined.

Findings

Perianal region: No visible external lesion.

Rectum: Mucosa appears unremarkable; small internal haemorrhoids seen on retroflexion.

Sigmoid colon: No visible mucosal lesion.

Descending colon: No visible mucosal lesion.

Transverse colon: No visible mucosal lesion.

Ascending colon: No visible mucosal lesion.

Caecum: Mucosa appears unremarkable; landmarks documented.

Terminal ileum: Examined segment appears unremarkable.

Polyp identified: No

Biopsy taken: No

Other intervention: None.

Assessment / Impression: Small internal haemorrhoids. No other visible lesion in the examined bowel.

Recommendation: Review findings in the clinical context with the referring clinician. No surveillance interval is prescribed by this example.
