FICTIONAL EXAMPLE - NOT FOR CLINICAL USE

Illustrative report content only. Not a clinical reference.

Flexible Sigmoidoscopy

Date: 01 Jan 2026

Patient	FICTIONAL PATIENT	**Identifier**	DEMO-001

Procedure

Indication: Intermittent rectal bleeding (fictional).

Consent and safety checks: Consent and identity checks documented.

Preparation and visibility: Enema preparation; visibility adequate in the examined segment.

Sedation / analgesia: No intravenous sedation in this fictional examination.

Extent and landmarks: Examined to 50 cm from the anal verge; proximal bowel not assessed.

Limitations / reason for stopping: Examination limited to intended sigmoidoscopy extent.

Findings

Perianal inspection and digital examination: No palpable mass in this fictional examination.

Rectum: Small internal haemorrhoids seen on retroflexion.

Sigmoid colon: Mucosa unremarkable within the examined segment.

Additional bowel examined: No additional segment confidently identified.

Lesions: site, distance, size and morphology: No polyp identified within the examined segment.

Sampling and interventions

Biopsy taken: No

Sampling sites, number and specimen labels: Not applicable.

Intervention and retrieval details: None.

Immediate adverse events: None observed.

Conclusion

Impression: Small internal haemorrhoids; proximal colon not evaluated.

Plan and communication: Discuss findings and further evaluation with the referring clinician. No interval is prescribed by this example.
